Avoid Dealership Gimmicks

At most car dealerships these days, the sales people spend more time trying to sell you extended warranties, financing, undercoating and the like, than they do selling you the actual vehicle! There's a very good reason for this: All these add-ons make big money for the salesperson and the dealership. These add-ons are almost always overpriced and a bad deal for the buyers.

Your credit union urges you to think twice before being badgered into buying these extras. You can most always find better financing terms at your credit union, and better deals on extended warranties, etc., by shopping on your own. Stop by your credit union to arrange low-cost financing before buying.

12 MONTH REPAYMENT PERIOD .

While the holidays are traditionally a season of giving to others, oftentimes people like to give themselves a reward for 12 months of hard work or a special gift to "self and spouse" to mark a special occasion. This can take the form of a winter vacation, new bedroom furniture, a home entertainment center, or even a new vehicle.

Whatever your holiday wishes might be, your credit union would like to make them come true. Some Restrictions Apply. Call or stop by your credit union for details.

COMPARE RATES HFFCU VISA @ 9.90%

If you have credit cards at home improvement stores, furniture stores, department stores and other companies that offered you a low introductory offer or deferred payment plan, chances are when the offers run out, you'll be looking at 18-24% interest rates. Most of these high interest rates accrue during your deferment period and come due at the end of the offer. In addition, the high interest rate is then applied to any unpaid balances. Maybe these companies offered a good deal up front, but they get you in the end.

How does 9.90% on a HFFCU Visa card sound? If you need to charge, use our card.
